Cannabis for the Management of Symptoms of PTSD: Surveillance – February 2024

Objective and Search Period

To identify new eligible controlled clinical trials and observational studies with comparator groups examining the effects of cannabis on PTSD symptoms, we searched Ovid MEDLINE ALL, PsycINFO, Cochrane Database of Systematic Reviews (CDSR) CENTRAL, PTSDPubs, and clinicaltrials.gov for studies published from **December 2022 to early February 2024**.

Surveillance Update

Our updated searches identified 166 unique citations. After review, we found no new studies that met our eligibility criteria. The next surveillance will be conducted in February 2025. We have chosen to move from a 6-month search interval to a one-year interval due to the pace of research in this area.
